YAMAHA: OVER 130 YEARS OF EXPERTISE IN INSTRUMENTS

TECHNOLOGY MEETS TRADITION

Tradition and innovation have always been driving forces at Yamaha. As a result of digital piano development we set up a new benchmark with the Clavinova series in 1983. From this starting point we've consistently gone the way of designing the highest standard digital pianos from classical pianos, up to our portable pianos and keyboards. Regardless of model, they all stand for high quality materials, craftsmanship, and the latest audio & digital technology. And all must pass our strict quality controls.

PURE PLAYING ENJOYMENT

Our digital pianos come packed with features, highlights and state-of-the-art digital technology. Experience keyboard actions, with the touch and feel of an acoustic grand piano, or the rich authentic sound of the world-famous Yamaha CFX Concert Grand Piano. Enjoy a vast selection of extraordinary and versatile voices and sounds for countless hours of musical exploration and fun. Just right for all ages and piano skill levels.

A UNIQUE COMBINATION

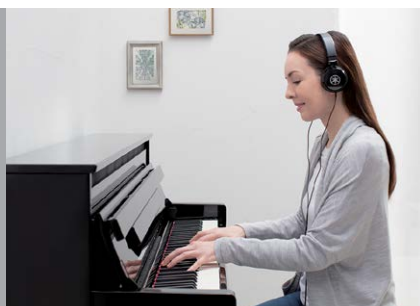

With more than 130 years of uncompromising craftsmanship in instruments and digital engineering for more than 30 years, Yamaha has a unique knowledge and experience in making various musical instruments. Our dedication to precision is no coincidence: after all, our founder was a trained watchmaker, whose attention to detail established our philosophy of setting the highest of standards in quality and reliability. Today this can be experienced in every Yamaha instrument.

MORE MUSIC MAGIC

Uncompromising quality and the very latest in audio and digital technology make our portable pianos the perfect musical partners for more playing fun, learning, and creative expression. Experience the feeling of a grand piano at your fingertips and let the music take you to new playing heights. Transport and setup are always quick and easy, so you're ready to play when and where you want. Whether at home or live on stage, with Yamaha portable pianos the musical journey never ends.

CLAVINOVA SERIES

Turn your living room into a performance venue for a top-flight grand pianos

- Grand Expression Modeling ■ GrandTouch / GrandTouch-S keyboards
- Faithful simulation of the sounds and resonance of two world-class concert grand pianos
- Grand Acoustic Imaging ■ Advanced binaural sampling
- Equipped with fortepiano (period instrument) voices ■ Equipped with instructive lesson songs, rhythms, Bluetooth audio / MIDI, Smart Pianist app compatibility, and other entertaining functions that only a digital piano can deliver

The very best keys and pedals

Since the inception of Clavinova in 1983, Yamaha has developed the digital pianos in this lineup with the aim of achieving the same feel as a grand piano. The keys have an extraordinary impact on the feel of a piano, and Yamaha has focused on delivering grand piano feel in the designs of the keys used in Clavinova pianos.

Experience the distinct characteristics of two concert grand pianos

Yamaha used all-new samples for the voices of two world-class concert grand pianos—the bright, brilliant voice of the Yamaha CFX, and the warm, deep resonance of the Bösendorfer Imperial. The highly distinctive sounds of these pianos feature lush harmonics and

vivid resonance created from the sympathetic vibrations of the strings and soundboard, faithfully delivered in response to your articulation and pedaling. Richer tonal gradations than ever before give you an even greater range of dynamic expression.

Period instrument voices open the door to the world of classical music

CLP-700 Series is Yamaha's first instruments to be equipped with the voices of the fortepiano, the predecessor to the modern piano. The sounds emitted by a fortepiano are simpler than those of a modern piano, and decay much more rapidly. Hearing the sounds of the instruments played when the likes of Mozart, Beethoven,

and Chopin were composing their songs should illuminate the original intent behind the notes on the page. Here is a novel opportunity to communicate with historical composers by playing these period instruments.

Lifelike concert grand piano sound

The vitality of the grand piano makes it feel as though it is alive, and Yamaha is committed to equipping Clavinova with the same ability to produce rich, natural sound. This is achieved

through the real-time calculation of the sympathetic sounds produced by the reverberations of the entire instrument from simulations of the distinct characteristics of the original sound sources—the Yamaha CFX and the Bösendorfer Imperial.

Acoustic design ideology

Acoustic design is a key element of sound creation. This is because, unlike acoustic pianos, digital pianos emit sounds from speakers. Even with a

tone generator of the highest caliber, advanced acoustic design technology is an essential element in allowing an instrument to sound like a grand piano. Key to the Clavinova design is a focus on enveloping the player with sound and reverberation to recreate the pleasing feeling of playing a grand piano. Only Yamaha possesses the acoustic piano and professional audio design capabilities needed to create speakers that emit the highest quality sound. Yamaha's truly unique synergy of experts with innovative sound technology and know-how enables Clavinova pianos to recreate the vivid sound image and sound field of grand pianos.

Enjoy a dialogue with great piano

Playability

The dialogue with a piano begins when the player touches the keys. The player wants to know that the keys are easy to play, that they are capable of subtle, nuanced musical expression, that they can handle the player's most powerful intensity, and that they offer total control. Yamaha aims to make pianos that elicit smiles and flurries of the heart the moment the player puts their hands on the keys.

Sensitivity

In actuality, pianos must be just as expressive as players are required to be. Yamaha views the richness of tonal variation of a piano as the indicator of the instrument's expressive capabilities. A great piano one with tonal variation that reflects the player's individuality. The output of a highly sensitive piano matches the subtle differences in the input, encouraging the player to hone their expressive capabilities.

Sound Quality

A grand piano is a musical instrument composed of 8,000 parts. The complex interaction of each mechanism in the instrument produces various tonal elements that interact with each other to form a richly varied palate of beautiful sound, from clear, resplendent tones to warm resonance.

Clavinova

CVP SERIES DIGITAL PIANOS

Broaden your musical horizons with a comprehensive array of authentic Voices and a superb grand piano touch

- Auto-accompaniment functions for full ensemble performance.
- Perform with an impressive library of Voices, comprehensive karaoke and other vocal functions.
- Enjoyable learning functions for players who are just starting out!

Experience the difference

The CVP series of digital pianos retains the expressive capability and playing feel of a grand piano while offering the ability to perform with the sounds of a diverse array of musical instruments. Play with the backing bands provided by the accompaniment Styles, sing along with your performance, or enjoy the pure freedom of the piano—the CVP series lets you do it all.

The experience of playing with a full backing band, all from this one instrument

In addition to allowing you to choose from a range of pianos, including both acoustic and electric instruments

An authentic grand piano experience offered by a combination of tradition and technology

From breathy saxophones to ringing guitars and warm, resonant strings, the CVP Series features an impressive collection of natural instrument Voices

CVP-909GP

Grand piano elegance

The gentle curves and elegant silhouette of the CVP-909GP distill the allure of the grand piano into a wholly modern form.

Custom-designed sound system

The specially-designed sound system of the CVP-909GP utilizes the entire body of the instrument to provide the deep, resonant sound and broad dynamic range of a grand piano.

Two incredible grand piano voices

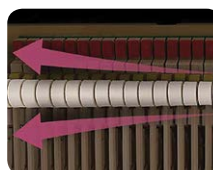

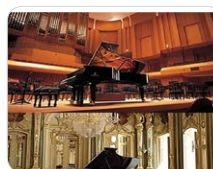

Voices from the CFX, Yamaha's finest concert grand piano, and Bösendorfer's legendary Imperial, with each key sampled individually. Thanks to binaural sampling, CVP Series Clavinova offer a fully immersive concert grand experience, even when using headphones.

GRANDTOUCH S KEYBOARD 

PE

CVP-909

3-Way Speaker

This powerful 3-way system features mid and treble units, as well as bass speakers, which are available only on the CVP-909 and all units are optimally balanced and placed accordingly in the body to simulate the sound image of a grand piano.

CFX and Bösendorfer Imperial Voices

Clavinova grand piano sounds are recorded from several world-renowned concert grand pianos. One of them is the CFX, Yamaha's top-flight concert grand piano.

88-Key Linear Graded Hammers

The 88-key Linear Graded Hammers of the Clavinova is the first-of-its-kind to faithfully duplicate this graded touch with differing weights and key return on each one of its keys.

Experience rich stereo sound

The stylishness of a grand piano brings a sense of elegance to any room. Revel in the rich reverberations produced by the unique shape of the CLP-865GP, imparting depth and expansiveness to the sound.

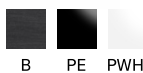

Bluetooth® connectivity makes playing even more fun

Use music apps on your Bluetooth device to play songs through the Clavinova's speakers, or even play along. You can even connect to the instrument wirelessly using Yamaha's Smart Pianist app.

CLP-885

GRANDTOUCH
KEYBOARD

Authentic key touch for serious players

Each key on the GrandTouch™ keyboard with key counterweights has a long pivot length which makes it easy to play regardless of where you touch the key, offering enhanced touch for a broader range of tone and responsiveness. This enables greater expressiveness even when you play with a delicate touch, such as in pianissimo, realistically simulating the feel of a grand piano.

Surround yourself in rich, high quality sound

The pinnacle of Yamaha's acoustic technology for digital pianos, Grand Acoustic Imaging reproduces the sound image of a grand piano. The technology offers the latest acoustic design optimized for the upright piano shape, allowing the sound to expand throughout your playing space. The Grand Acoustic Imaging on the CLP-885 delivers a natural stereo sonic presence that feels just like the sound is resonating from the soundboard of a grand piano.

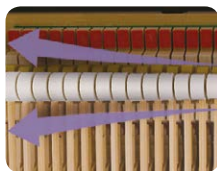

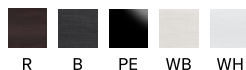

Period instrument voices open the door to the world of classical music

Equipped with four fortepiano voices. Exposure to the sounds beloved by Mozart, Chopin, and others in the 18th and early 19th centuries should create a deeper understanding of what these composers were thinking and feeling when they wrote their music, and cast modern piano playing in a new light.

CLP-875

GRANDTOUCH
KEYBOARD

Playability for full-fledged practice, approaching that of a grand piano

The CLP-875 features 88-key Linear Graded Hammers, with each key having its own weight and return, making the keyboard as a whole feel just like a grand piano. The instrument also features a GP Response Damper for a grand piano-like damper pedal feel. These features help instill a sense of accurate key touch and pedaling.

Immerse yourself in a natural sonic space

Yamaha's Grand Acoustic Imaging acoustic technology for digital pianos reproduces the sound image of a grand piano. The Grand Acoustic Imaging on the CLP-875 lets the sound expand throughout your playing space, creating a natural stereo sonic presence that feels just like the sound is resonating from the soundboard of a grand piano.

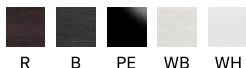

A design that replicates the acoustic piano in every detail

Equipped with Yamaha CFX and Bösendorfer Imperial voices. VRM intricately simulates the full sympathetic sounds created by the overlapping resonance of the strings and body of a grand piano. The exquisite piano sound makes every song sound great.

CLP-845

GRANDTOUCH
KEYBOARD

Experience a keyboard close to that of a grand piano

Each of the wooden keys of the GrandTouch-S™ keyboard is carved out of a single block of solid wood. Our woodworking techniques have been developed for the construction of acoustic pianos, to make the keyboard less susceptible to warping and curvature. The keys offer a solid feel.

Clear, rich sound for your musical enjoyment

The two-way speaker system of the CLP-845 uses individual speakers for the low end and mid- to high-range sound, delivering a clear sound with depth.

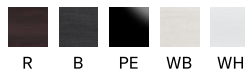

Pedal feel that closely approximates a grand piano

Use music apps on your Bluetooth device to play songs through the Clavinova's speakers, or even play along. You can even connect to the instrument wirelessly using Yamaha's Smart Pianist app.

CLP-835

GRANDTOUCH
KEYBOARD

A piano that fully responds to the player's sensibilities

Grand Expression Modeling reproduces the diverse tonal variations created by differences in the force and speed with which the keys are pressed and released and enables a fuller experience of playing than ever before, helping pianists develop genuine expressive abilities.

Enjoy playing piano even more with features unique to digital pianos

The CLP-835 features two fortepiano voices. The rhythm function adds more fun and pizzazz to simple performances, and the audio recording function lets you listen to the performances you're particularly pleased with on a computer or other device. What's more, the built-in volume limiter prevents unintentional sounds that are too loud from being output.

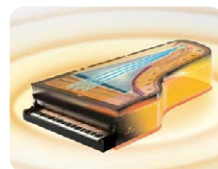

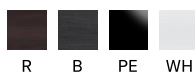

Easy to control with full text LCD

An easy-to-read display and a simple interface for selecting functions such as rhythms and lesson songs. Dedicated panel buttons give quick access to the Yamaha CFX and Bösendorfer Imperial piano voices.

CLP-825

GRANDTOUCH
KEYBOARD

Experience the sound of a grand piano in the comfort of your living room

The CFX and Bösendorfer Imperial sounds in the CLP-825 faithfully reproduce these two distinctive pianos with their colorful and lavishly resonant tones. The full ambience of the sound while playing with headphones eliminates stress.

Delight in a reassuring grand piano feel

The GrandTouch-S™ keyboard with synthetic ebony and ivory keytops gives you the sense of controlling a grand piano key action to produce just the sound you want to hear. This is a keyboard that is easy to play, even after long periods of time.

Bluetooth® connectivity makes playing even more fun

Use music apps on your Bluetooth device to play songs through the Clavinova's speakers, or even play along. You can even connect to the instrument wirelessly using Yamaha's Smart Pianist app.

The comprehensive ARIUS lineup has just the right piano to make your dream a reality

- With their meticulously crafted keyboards, ARIUS Standard series instruments deliver the rich sound of a grand piano, and provide luxuriously expressive piano performance.
- Enjoy playing with rich, realistic sound—even with headphones.
- Compatibility with Yamaha's free Smart Pianist app lets you connect a smart device and perform operations such as Voice selection and Song playback.

Enjoyment that stays with you

This ARIUS digital piano is a finely crafted instrument made possible by the culmination of over a century of advanced Yamaha technologies and expertise. With its remarkably authentic sound and expressive sensitivity, it provides a profoundly new piano experience. If you're just starting out on the piano or you simply want a beautifully stylish piano in your home—the comprehensive ARIUS lineup has just the right piano to make your dream a reality.

The Pure CF Sound Engine is the result of many years of piano-making history and expertise, combined with state-of-the-art sampling technology

Half-damper pedal control creates more detailed nuance and subtlety when playing, similar to pedaling on a grand piano

Graded Hammer 3 (GH3) 88-key piano action reproduces the touch of an acoustic piano

"Digital Piano Controller" app with an attractive interface optimized for iOS touch screens adds a whole new level of functionality to your Yamaha instrument

YDP-165

Authentic acoustic piano playability and half-damper pedal control

The GH3 keyboard provides a grand piano-style response and feel, allowing rapid note repetition and authentic expressive control. Moreover, there's a half-damper feature that authentically replicates the damper action on a grand piano, providing rich expressive variation.

Rich, powerful sound provided by the tone escapement construction

The YDP-165 uses a newly developed tone escapement construction on the back of the cabinet that emanates sound from inside the piano. This allows you to experience the natural sound radiation and three-dimensional resonance like that of an acoustic piano.

Features for greater listening comfort when using headphones

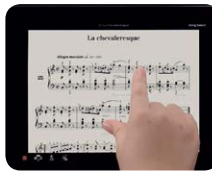

The YDP-165 employs new technology that corrects the sound balance optimally according to the volume you set—giving you an exceptionally natural sound that's easy to listen to and is gentle on the ears, even when playing for a long time.

YDP-145

Harmonic resonance like that of a grand piano—virtual resonance modeling lite (VRM lite)

The YDP-145 elaborately reproduces this rich sympathetic resonance through a groundbreaking technology called Virtual Resonance Modeling Lite (VRM Lite). VRM Lite creates a richly varied sound by simulating the complex sympathetic tones created when the vibrations of the strings are propagated to the soundboard and other strings, corresponding to the timing and intensity of key playing and pedaling.

Rich variety of built-in songs, and intuitive operation with smart pianist app

YDP-145 has an authentic grand piano sound, but it also features various other built-in instrument sounds, for a total of 10 Voices—including electric piano, organ, vibraphone, and strings.

Features for greater listening comfort when using headphones

The YDP-145 employs new technology that corrects the sound balance optimally according to the volume you set—giving you an exceptionally natural sound that's easy to listen to and is gentle on the ears, even when playing for a long time.

YDP-105

Provide perfectly balanced sound throughout the piano's range

The YDP-105 is designed to provide perfectly balanced sound throughout the piano's range, with clear, powerful basses and an excellent tone. Revel in superb AWM stereo-sampled reproductions of instruments such as a Yamaha grand piano delivered through newly designed speakers in rich harmonic detail that makes any musical endeavor—whether practice or play—a truly inspiring experience.

Reproducing the resonance of an acoustic piano

Damper Resonance reproduces the broad, deep sound field of an acoustic piano. It also mirrors the tonal changes that result when a damper pedal on a grand piano is depressed. It includes sounds such as those emitted from the key bed and emulates the cumulative resonance that occurs when all of these sounds blend together.

Stylish design matches your room interior

The YDP-105 employs new technology that corrects the sound balance optimally according to the volume you set—giving you an exceptionally natural sound that's easy to listen to and is gentle on the ears, even when playing for a long time.

BEGIN YOUR MUSICAL VOYAGE

P Series gives you the dynamic, high-quality sound and natural piano touch response they expect from Yamaha—manufacturers of world class acoustic pianos for more than a century. These Yamaha hallmarks, along with a high-quality built-in stereo speaker system, are packed into a slim design.

P-S500

The P-S500, you can enjoy the exquisite beauty and sought-after tone of both the Yamaha CFX and Bösendorfer Imperial concert grand pianos. With over 600 Voices, P-S500 gives you a wide selection of sounds to choose from, making it the perfect tool to create and perform in any musical genre. The Yamaha P-S500 Digital Piano is a smart piano that can show you which keys to play using the unique Stream Lights function. Fully integrated into the Smart Pianist app, the P-S500 is sure to help you progress on your musical journey.

APPS

Smart Pianist

Smart Pianist is a free application that will help you enjoy life with your piano a whole lot more – it can even be used to configure instruments with ease!

This single application for use with Yamaha digital pianos can display scores or preset song data.

Rec'n'Share

Use the Rec'n'Share app to connect your instrument to a smart device, and then create and share audio and video recordings of you playing along with your favorite songs.

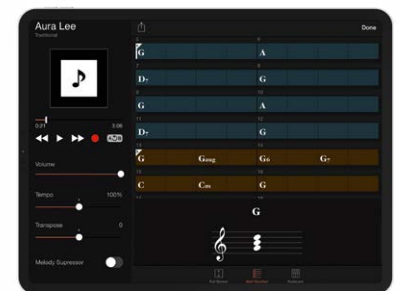

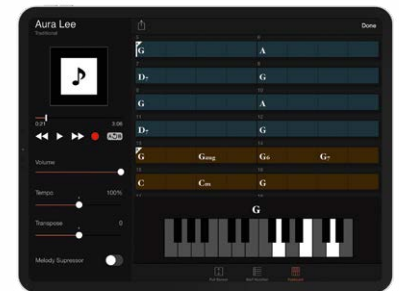

Only supported on the CVP-900 Series

Chord Tracker

Have you ever tried to figure out what the chords are to your favorite songs? Yamaha's new Chord Tracker app does the hard work for you, and much more! The Yamaha Chord Tracker app helps you practice and perform songs by analyzing the audio song stored in your smart device and then displays the chord symbols for you.

All Apps are available for Android and iOS

THE LANGUAGE OF DIGITAL PIANOS

KEYBOARD

NWX Keyboard: The NWX keyboard found in P-515 features white keys made from only the best quality wood and topped with synthetic ivory. The black keys are finished in textured synthetic ebony. Furthermore, this keyboard features the true feel of the escapement mechanism found in a grand piano which the hammers away from the strings quickly after they strike them, in order to prevent any interference with string vibration.

GH3 Keyboard: The Graded Hammer 3 (GH3) keyboard reproduces the touch of an acoustic piano, from a naturally heavy feel in the lower register to a lighter touch in the upper octaves. The GH3 keyboard provides a grand piano-style response and feel, allowing rapid note repetition and authentic expressive control.

GHS Keyboard: The Graded Hammer Standard (GHS) keyboard reproduces the touch of an acoustic piano, from the heavy feel in the lower register to a lighter touch in the upper octaves.
