# Install the Expansion Pack using Expansion Manager

## 1. Save Instrument Info from the SX

1.1 : Connect a USB pen drive to the [USB to Device] terminal of the SX keyboard

1.2 : Select [Menu] > [Menu 2] > [Expansion]

1.3 : Press [Export Instrument Info]

1.4 : Follow the instructions on the screen & save

This saves the Instrument Info file to the USB flash drive as example: PSR-SX900\_InstrumentInfo.n27

Keyboard Firmware: PSR-SX 600 v1.03 PSR-SX 700 v1.11 PSR-SX 900 v1.11

2. Add Instrument Info of which you want to install pack content to Install Target

#### 2.1 : Download & Install EXPANSION MANAGER

Link <a href="https://in.yamaha.com/en/products/musical\_instruments/keyboards/arranger\_workstations/psr-sx900/downloads.html#product-tabs">https://in.yamaha.com/en/products/musical\_instruments/keyboards/arranger\_workstations/psr-sx900/downloads.html#product-tabs</a>

- 2.2 : Connect a USB pen drive to computer & click Install Target in the Expansion Manager
- 2.3 : Select Instrument Info from the USB pen drive

The instrument will be added to the Install Target

### 3. Download Expansion Packs

- 3.1 : Visit in.yamaha.com
- 3.2 : Search for Expansion Pack

link https://in.yamaha.com/en/products/contents/keyboards/vse/ index.html

- 3.3 : Select your desired Model
- 3.4 : Select desire Pack
- 3.4 : Click the link & Save the Pack

The Expansion will download in .cpf format

New Voices and Styles packs are being delivered as encrypted data. You must use Yamaha Expansion Manager (YEM) to create a pack install file to load this pack into your instrument.

#### 4. Add [+] Expansion Pack.cpf to Expansion Manager

4.1 : Clicking [My Packs] & select the .cpf file

4.2 : Select the Instrument to which you want to install pack
4.3 : Click [Save as Pack Install File]

save as .cpi file or ppi file or cqi file

Save the .cpi or ppi or cqi files to a USB pen drive & install it on the SX (refer to the owners manual or reference manual for detail instructions)

Step 4
